Greetings!

I sending this a second time in case you missed it or didn't really have time to take a look the first time. ClassACT (Achieving Change Together) HR73 invites you to join fellow Harvard-Radcliffe Class of 1973 classmates to work together to create positive social and environmental change.

Over the past year, we have:

- Identified two potential long-term initiatives- "CLASS ACTS" - one honoring classmate Benazir Bhutto and the other centering on climate change - and four classmate driven projects.
- Launched a website www.classacthr73.org where YOU can sign up to keep informed about what we are doing, or, if you want to become active right away share your talents around issues that matter to you.
- Reached out to Harvard, including the Alumni Association whose director, Philip Lovejoy, is intrigued and expressed an interest in making ClassACT HR73 a model for other classes!
- Formed a Board, become a 501 (c) non-profit, etc. and instituted all that formal stuff
- Hosted a dinner in Washington DC with Ellen Calmus and Roger Myerson to introduce the work of Ellen's Corner Institute.
- WE ARE READY TO ROCK AND ROLL!

Who are we?

We are YOU.

Leverage your talents, special interests and expertise by working with classmates to make a difference.

Join ClassACT HR73 Board members and fellow and sister classmates (*partial list below*).

For those of us who have been working on this, the reward of time spent doing good, solving problems and just plain hanging out with classmates is fabulous. The best way to describe it is that it is like ***a marathon reunion -- intellectual, provocative, and fun.***

Class ACTS

We are in discussion for the following two initiatives:

- A Class ACT in honor of **Benazir Bhutto**, led by Rob Adams, Therese Steiner, and Marion Dry with classmates Peter Galbraith, Holly Weeks. The initiative will have three progressive goals:
Phase I: to create a symposium (Spring 2016) around issues of importance to Benazir– the education of women/leadership/politics in the Muslim world; **Phase II:** to provide scholarships for women from Muslim countries to study at Harvard; **Phase III:** to endow a Chair in the name of Benazir Bhutto. - **Climate Change** led by Jonathan Sprague
2014 was the warmest year on record. Join classmates concerned with the impact of Global Warming on the environment, global politics, and future generations in developing solutions to address one of the most critical issues of our time. Check out more info on our website: [HERE](#).
